

Professionals in water!

Solutions and systems within the potable water, waste water and process water industry.

RWB differentiates itself by supplying standard systems on the one hand and by developing custom made solutions on the other hand. By keeping all disciplines, like engineering, process management,

assembly, commissioning and maintenance in-house and also because of a 24/7 service, RWB can offer a complete package in water treatment. That is our added value!

RWB's services

- Process technology
- Engineering
- System realization
- Service

HEALTHCARE WATER TREATMENT

Systems for medical, sterilization and laboratory water applications

1

HEMODIALYSIS SYSTEMS

RWB's range of water treatment systems for **hemodialysis** have been successfully and reliably used in hospitals for over **30 years**. Constantly updated with the latest technologies, all our systems are compliant with the most stringent standards for medical devices, including **UNI EN ISO 13485** and **93/42/EC**. Our technical service is highly specialized, thanks to our widespread network Throughout Italy, **RWB** ensures short response times and customized services.

7

STERILIZATION AND LABORATORY

RWB provides water purification systems via **deionization** and **reverse osmosis**, ensuring a high quality of water for **washing**, rinsing and **sterilization** of surgical instruments. **RWB's** ultrapure water systems are capable of providing highly pure water that meets the requirements of **laboratories**. **RWB's** systems are used to produce water for power supply systems for **chemical analysers**, **disinfection** of equipment and laboratory glassware and for autoclave **sterilization** systems.

2

WATER TREATMENT SYSTEMS FOR LEGIONELLA

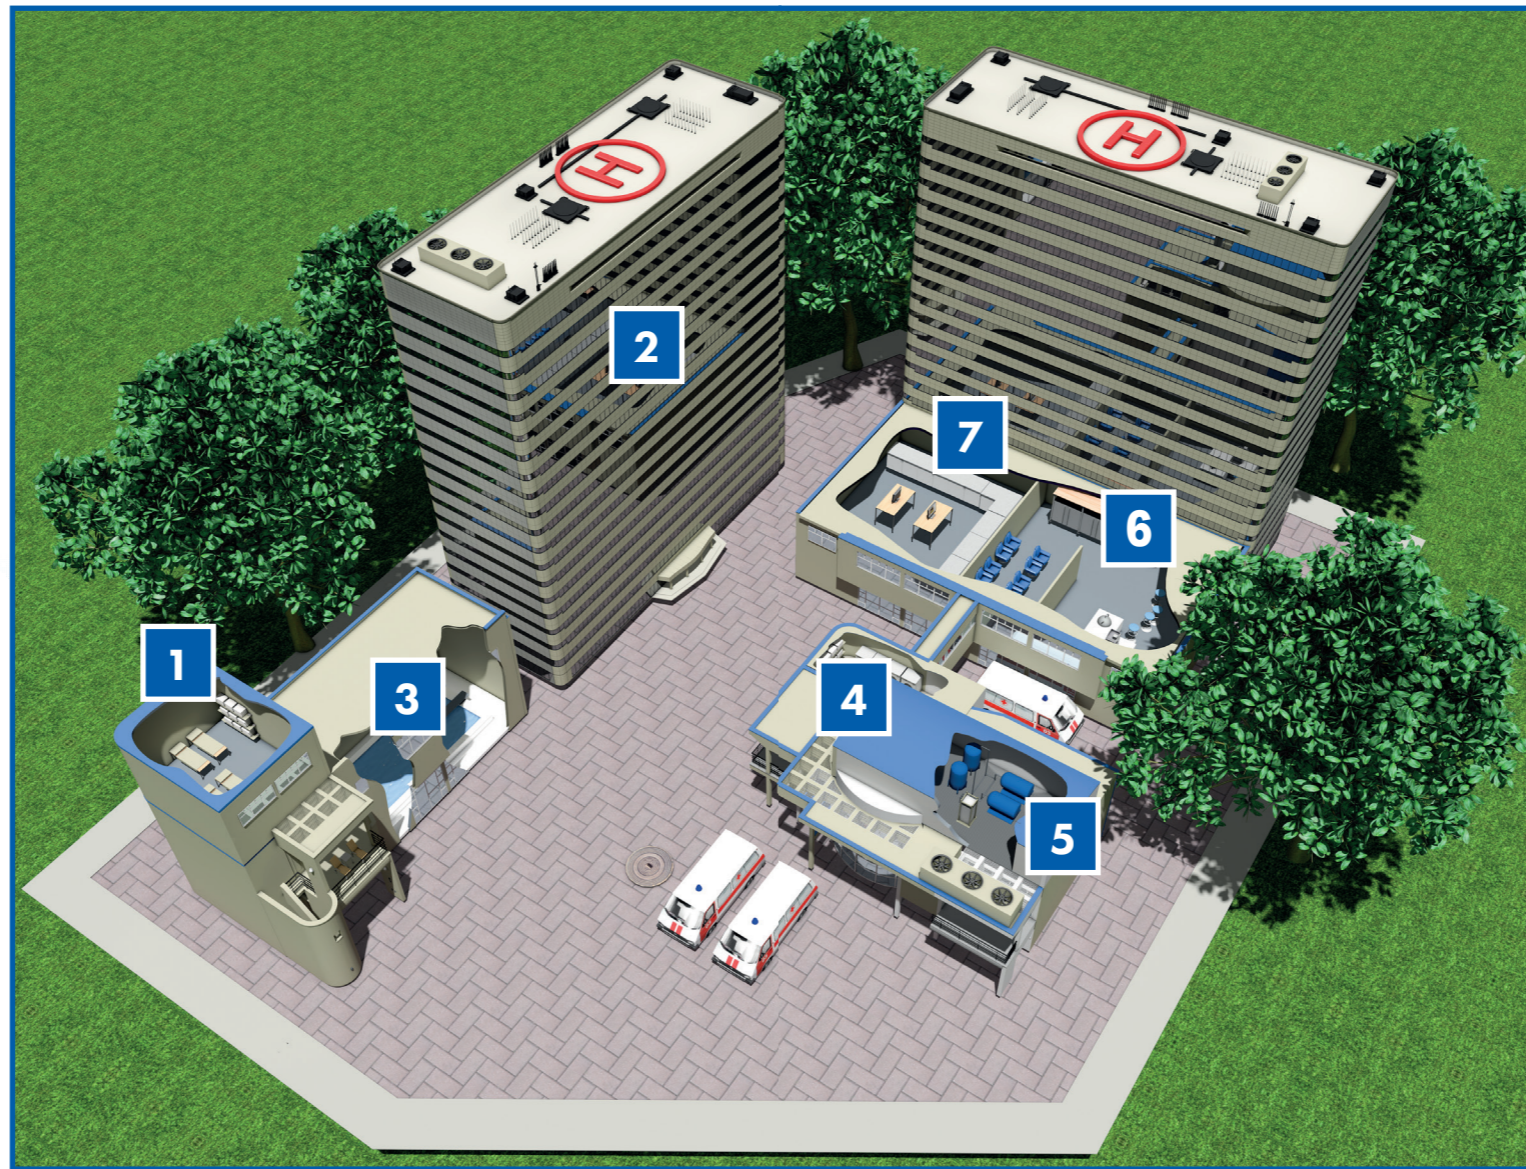

Sure+ Healthcheck is 3-stage process developed by **RWB**, that links the **risk assessment** stage to the equipment and **chemicals supply and operating** stage, to ensure that users receive water that is perfectly healthful, **thus reducing the risk** that dangerous bacterial strains develop, such as **Legionella**.

3

SWIMMING POOLS FOR REHABILITATION

RWB provides top **quality** water treatment systems for **swimming pools**, as well as for pools for **therapeutic** and **rehabilitative** purposes. The **RWB** treatment plant, with multilayer filter with sand or diatom powder, is the heart of the system that makes the swimming pool water perfect for each purpose.

4

DRINKING WATER TREATMENT SYSTEMS

RWB offers a complete range of **treatment systems** to make **drinkable water** from any private supply, to be independent of the aqueduct. Using a variety of **technologies** we can offer **state of the art** solutions, which are both economically **advantageous** and fully **eco-friendly**. **RWB** can provide all the systems necessary ensure drinking water quality within all types of hospitality facilities.

6

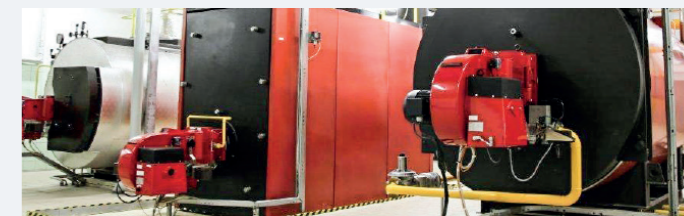

WATER DISPENSERS FOR MEDICAL WARDS AND OFFICES

Ideal for **offices** and easy to fit in any **medical ward or department**, **RWB** water dispensers have **cooling** units or integrated water **carbonation** and **filtration** systems. With the **Firewall** system, Culligan provides **bacteriologically pure** water for the hydration and health of patients and employees.

5

HEATING AND AIR CONDITIONING SYSTEMS

RWB provides a complete solution for preserving **heating, air conditioning** and **domestic water supply** circuits, improving efficiency and ensuring that users have water that is compliant with hygiene and health regulations. Thanks to technologies for the treatment of boiler feed water, such as **water softeners, deionizers** and **reverse osmosis systems**, **RWB** is able to offer a solution for any hot water system requirement.
